4. KEY ISSUES & STATUS

4.1 Implementation Status and Key Decisions

The World Bank team noted substantial progress since the last mission in October 2024 in terms of the results in Fayda ID registration, card issuance, authentication, and service integration.

1. Fayda Registration has expanded at an impressive scale, mostly thanks to registration partners. By September 2025, over 25 million residents had been registered for Fayda, including 11.8 million in FY2025 alone, representing 91 percent of the annual target. Most of Fayda registrations are done through registration partners, including Ethio Telecom, EthioPost, Commercial Bank of Ethiopia, Oromia Finance Bureau, and Addis Ababa CRRSA. Outreach has also extended to schools, displaced populations, refugees, and vulnerable groups such as people with disabilities, through partnership with Deborah Foundation. The procurement of the Super agents is nearing completion, which is expected to further accelerate registration especially in the rural areas. This will also allow the private sector to participate in Fayda ID registration process.

2. Card issuance and authentication are showing tangible results. More than 6.67 million Fayda cards have been printed and distributed—2.8 ml people through EthioPost and 3.8 ml people through Ethio Telecom. Authentication services have also expanded rapidly, with over 32.3 million successful authentications to date, averaging 130,000 per day. Fayda has been made mandatory for a growing range of services, including new bank accounts, TINs (with over 5 million harmonized), property and notary transactions, SIM card registration, and student enrollment for national exams. Integration is also progressing with CRVS, the Ministry of Revenues, the Ministry of Agriculture, and with RRS/UNHCR for refugee management.

3. While the mission appreciated the pace and numbers achieved in terms of Fayda registration, the mission encouraged NIDP to continue to invest in the use cases where the real impact of digital ID is.
