

MAURITIUS DATA CENTER MARKET BRIEFING

A strategic overview of the data center
investment opportunity in Mauritius

A Xalam Analytics Country Report

July 2025

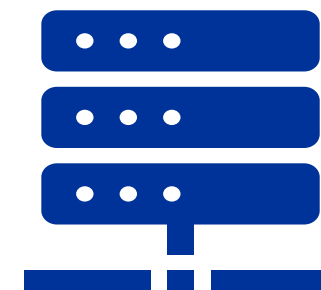

This report is part of a series of market briefs developed by Xalam Analytics at the behest of Digital Investment Facility (DIF) under the Data Governance in Africa Initiative, on the data center market opportunity in sub-Saharan Africa (“SSA”). This analysis aims to provide key insights into market demand and supply patterns for data center markets, business landscape, regulatory impact and investment returns. The research aims to provide potential investors and stakeholders with the latest information on the data center market in the SSA region.

This country review is based on our assessment of information and data as available to our research. It is further underpinned by our understanding of the marketplace along with market data and insights collected through continuous research. The numbers and estimates in this report are derived from a mix of sources, including estimates from Xalam Analytics’ economic models, data providers, regulator data and other sources as may be indicated.

This report is prepared with funds from the [Data Governance in Africa Initiative](#), a project financed by the European Union, Germany, Belgium, Estonia, Finland and France under the [Digital for Development \(D4D\) Hub](#). Its contents are the sole responsibility of Xalam Analytics and do not necessarily reflect the views of the funders.

No part of this material may be reproduced, copied or duplicated in any form or by any means, or redistributed, without the written consent of Xalam Analytics or DIF. Any reproduction or distribution of this report, or use within artificial intelligence language models without the prior written consent of Xalam Analytics is prohibited.

The Mauritius data center investment case

A strategically-located, business-friendly and digitally-advanced market offers opportunities to attract larger scaler data center deployments

THE OPPORTUNITY

- Mauritius is endowed with a **strategic location between Asia and Africa**.
- Solid demand potential - **Mauritius is a regional financial services hub** with a stable political environment, steady economic growth.
- A highly-rated market on ease of doing business.
- **Government's Digital Mauritius plan** aims to transform the country into a "Cyber Island".
- Extensive government push to develop renewable sources of power.
- **Extensive broadband Internet infrastructure**, with high penetration levels.
- 4 submarine cables with another on the way.

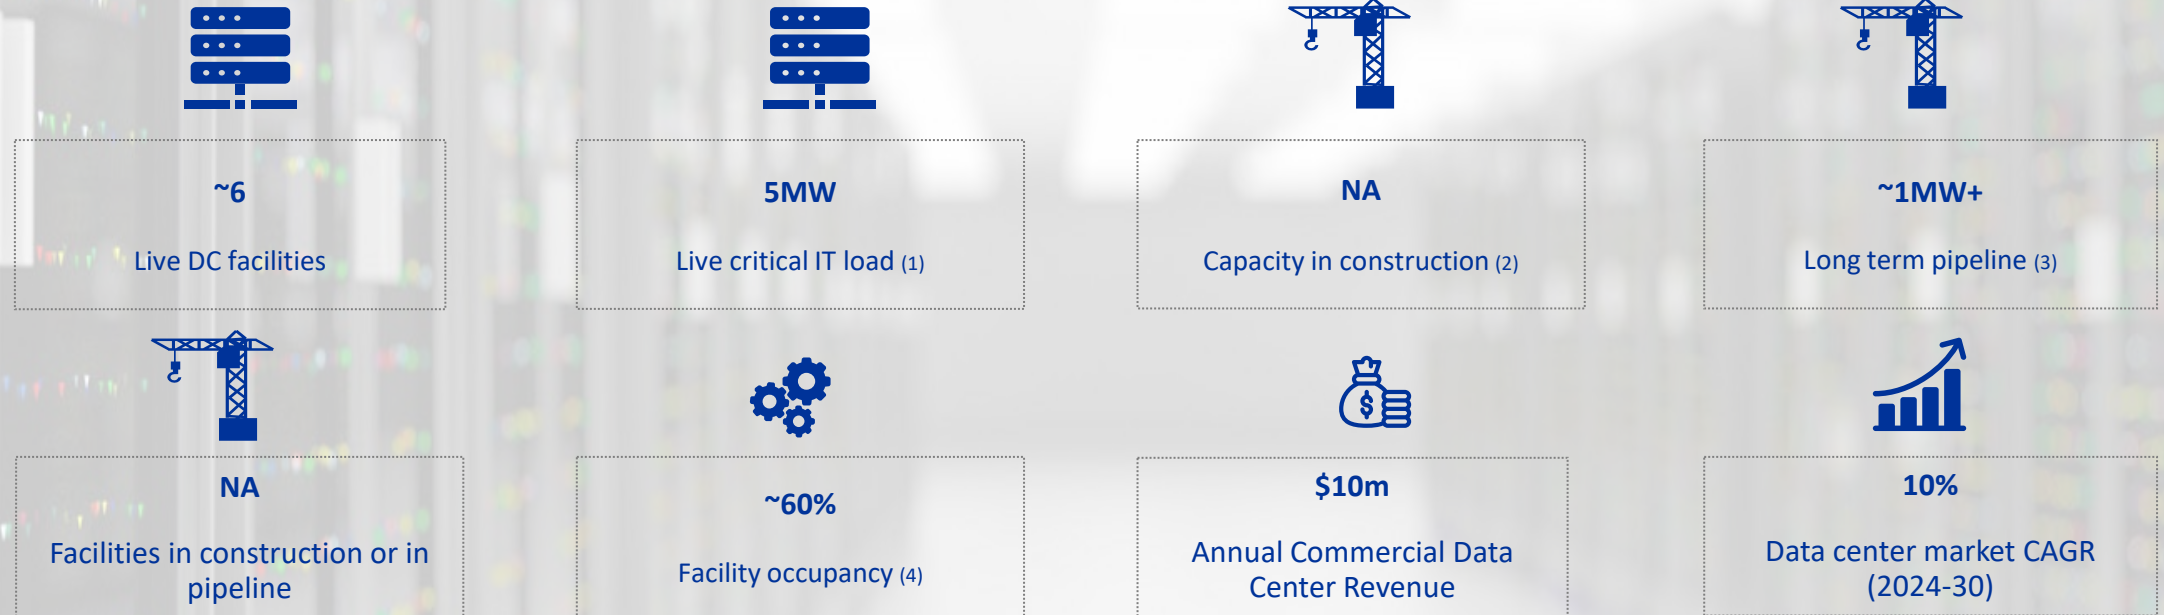

CHALLENGES & RISKS

- **Concentrated wholesale fiber** market keeps bandwidth prices relatively high.
- **Relatively constrained fiber diversity**.
- Still constrained power infrastructure, with limited room to support hyperscale requirements without major upgrade.
- **Carbon-intensive power supply**; renewable contribution to energy mix is still constrained, around 25%.
- Electricity prices are high - \$0.20/kWh.

Mauritius data center market overview

Estimates as of 2024

(1) Capacity that is active, under lease or readily available for lease by third-party customers.

(2) IT load capacity from facilities currently in construction; construction has broken ground; ongoing civil works, installation and commissioning phases are in progress.

(3) Facilities explicitly announced or listed as in development. Some execution phases have been initiated (e.g. land control, energy supply commitments, etc.), but no actual civil works have been undertaken. Capacity expected to be available by the end of 2030.

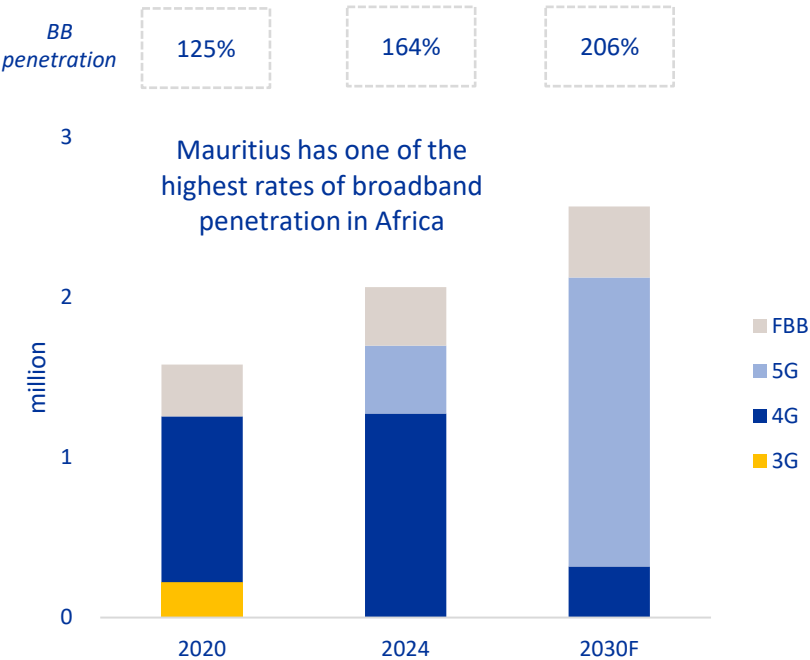

(4) Percent of available capacity that is effectively being used by third party customers.

Key drivers of demand for data centers

A mature Internet market with extensive digital infrastructure looking to enter the next phase of its digital transformation journey

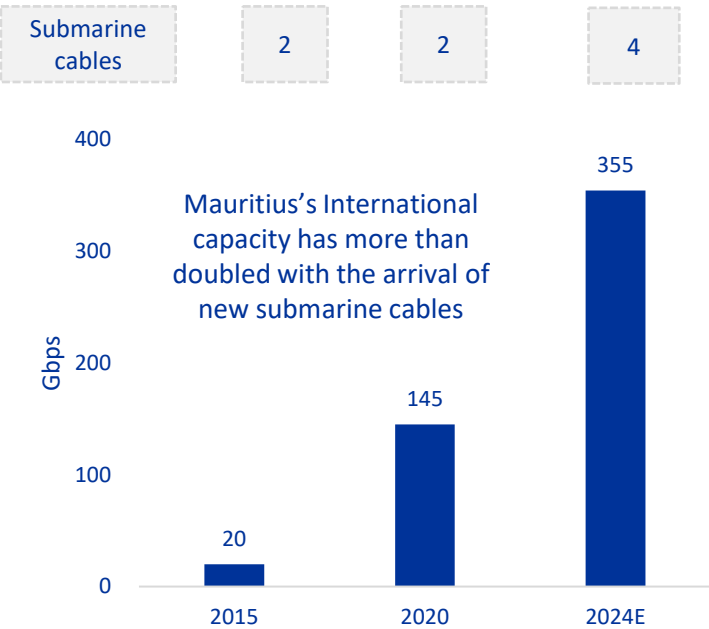

A highly-connected market
- Mauritius broadband connections by type - million

High Internet penetration, stable economy
Sample Mauritius economic indicators - 2024

Accelerated digital infrastructure build
Mauritius international Internet bandwidth – Gbps

Sources: ICTA and provider data, Xalam Analytics estimates

Data center market conditions

Operating conditions are mostly favorable to data center facility development, but pockets of persistent constraints remain

Fiber Markets

- Extensive terrestrial fiber reach across the island; near 100% coverage.
- Good subsea cable diversity; four high-capacity cables and a fifth on the way.
- A competitive, but concentrated fiber market; dominant presence from telcos Mauritius Telecom and Emtel.
- Wholesale fiber prices are high and remain a constraint to deeper fiber adoption.

Data privacy & hosting regulations

- Digital Mauritius plan aims to transform the country into a Cyber Island.
- Sector governed by Mauritius Data Protection Act of 2017, largely modeled against Europe's GDPR.
- Government looking to develop a Mauritian sovereign cloud.
- The Act established an independent data protection office (DPO).
- Transfer of personal data outside of Mauritius is allowed, subject to user consent or if such transfer is considered necessary.

Electricity Markets

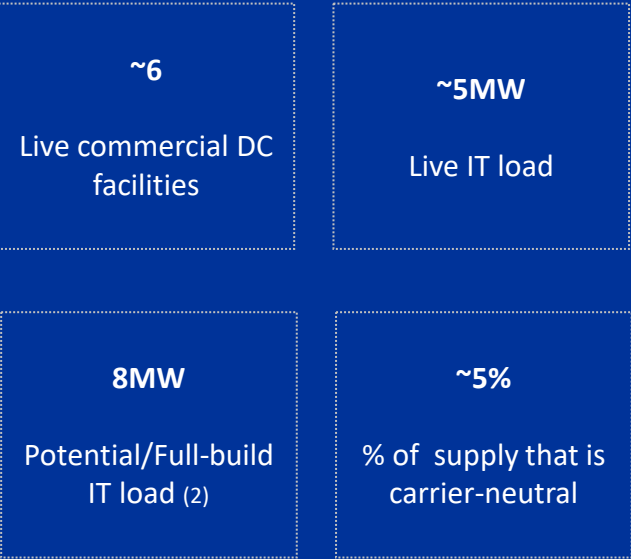

- Mauritius has a generation capacity of ~900MW, enough to meet estimated market demand.
- Renewables estimated at around 25% of the energy mix.
- Mauritius developing alternative sources of energy, including solar, wind, hydro and bagasse (a sugar cane byproduct); the government aims to increase the share of renewables to ~60% by 2030.
- A growing base of independent power producers, which produce ~40% of the country's electricity.
- Electricity prices are relatively high - \$0.20/kWh.

State of data center supply

Mauritius is the fifth largest commercial data center market in sub-Saharan Africa, based on available critical IT load

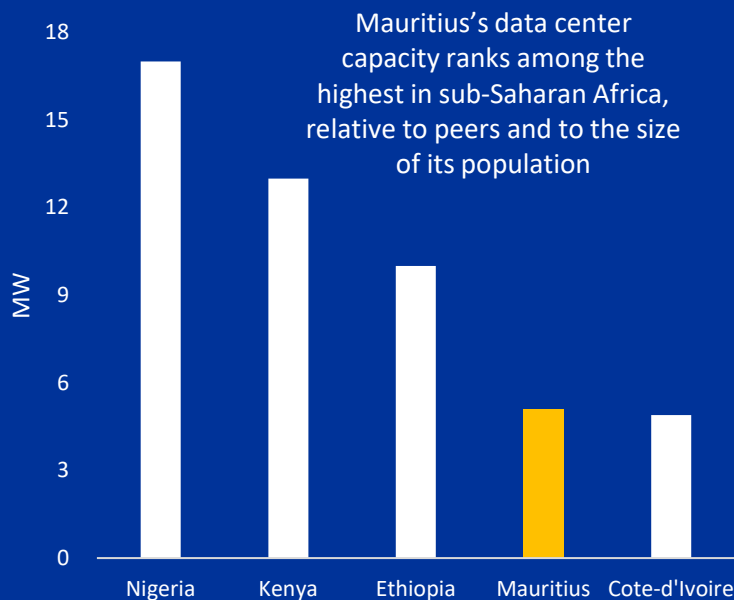

Mauritius data center supply – 2024E

Sample market indicators (1)

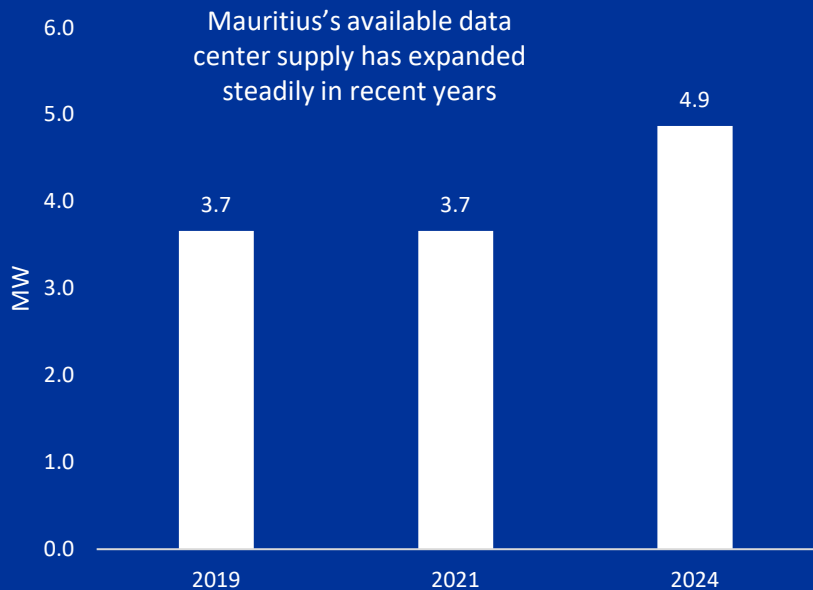

Mauritius vs. Sub-Saharan Africa peers

Live critical IT load – 2024

Mauritius data center market – evolution of live supply

Critical IT load - in MW

(1)Numbers are rounded up (2) Potential/Full-build load is facility capacity assuming that all phases of development have been completed. Additional CapEx would be needed to make the residual capacity operational.

Mauritius facility mapping – Port Louis metro

Key data center market players

Telcos dominate the Mauritian data center market; hybrid IT facilities are also pervasive

Telcos

telecom
mauritius

Focused on mobility and fiber - colocation is an adjacent opportunity.

IT Services Providers

Rogers Capital

harel mallac
technologies

State telco offering a range of IT services, including colocation

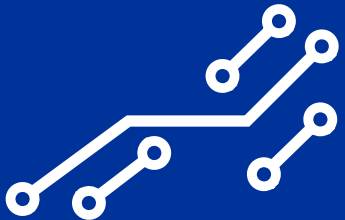

Hybrid facilities are the norm in Mauritius

- Telcos dominate the market; 80% of capacity from facilities managed by Mauritius Telecom and Emtel.
- A handful of IT services providers serving the enterprise market, with relatively small hybrid facilities.
- Most providers offer colocation as part of a broader portfolio of IT and cloud services.

GLOSSARY & KEY DEFINITIONS

Key definitions

Data center	While there are a variety of definitions for data centers, this market review is focused on commercial facilities , that is, facilities that lease colocation white space and power capacity to third-party customers on open, commercial terms, and in exchange for a fee. Captive facilities (bank data centers, telco switch sites and similar) are excluded from this assessment. Estimates focus on facilities at Tier II standard and above, unless otherwise indicated. Where applicable, these estimates include cloud hyperscaler self-built facilities.
Live critical IT load	Capacity that is active, under lease or readily available for lease.
Full build capacity	Data center facilities are typically built in phases; the full-build capacity is capacity assuming all potential phases of build have been completed and are live.
Capacity in construction	Facilities that have broken ground; ongoing civil works, installation and commissioning phases.
Pipeline	Facilities explicitly announced or listed as in development. Some execution phases have been initiated (e.g. land acquisition, power supply commitments, etc.), but no actual civil works have been undertaken.
Carrier-neutral	Facilities not specifically affiliated to a connectivity or cloud vendor, with capacity available to all third-party customers, on equal commercial terms, without explicit or implicit constraints or favoritism. This market review uses a loose definition for carrier-neutral, referring to facilities that are purely carrier-neutral, recognized by the market or effectively managed as such.

Glossary

Below are some of the key abbreviations used in this report

AI	Artificial Intelligence
ASN	Autonomous System Number
bn	billion
CAGR	Compound Annual Growth Rate
CapEx	Capital Expenditures
CDN	Content Delivery Network
Colo	Colocation
DC	Data Center
DIF	Digital Investment Facility
EAC	East African Community
EU	European Union
F	Forecast
FBB	Fixed Broadband
FDI	Foreign Direct Investment
FX	Foreign Exchange
GDP	Gross Domestic Product
GDPR	General Data Protection Regulation
ICT	Information, Communications and Technology
ISP	Internet Service Provider
IPP	Independent Power Producer
IT	Information Technology

kW	Kilowatt
kWh	Kilowatt Hour
LLM	Large Language Models
m	million
MNC	Multinational Corporation
MNO	Mobile Network Operator
MRR	Monthly Recurring Revenue
MSP	Managed Service Provider
MW	Megawatts
NDC	National Data Center
OEM	Original Equipment Manufacturer
POP	Point of Presence
PUE	Power Usage Effectiveness
RFS	Ready For Service
SEZ	Special Economic Zone
SSA	Sub-Saharan Africa
USD	US dollar
PUE	Power Usage Effectiveness
RFS	Ready For Service
SSA	Sub-Saharan Africa
YE	Year end
