

UGANDA

DATA CENTER MARKET BRIEFING

A strategic overview of the data center
investment opportunity in Uganda

A Xalam Analytics Country Report

January 2026

This report is part of a series of market briefs developed by Xalam Analytics at the behest of Digital Investment Facility (DIF) under the Data Governance in Africa Initiative, on the data center market opportunity in sub-Saharan Africa (“SSA”). This analysis aims to provide key insights into market demand and supply patterns for data center markets, business landscape, regulatory impact and investment returns. The research aims to provide potential investors and stakeholders with the latest information on the data center market in the SSA region.

This country review is based on our assessment of information and data as available to our research. It is further underpinned by our understanding of the marketplace along with market data and insights collected through continuous research. The numbers and estimates in this report are derived from a mix of sources, including estimates from Xalam Analytics’ economic models, data providers, regulator data and other sources as may be indicated.

This report is prepared with funds from the [Data Governance in Africa Initiative](#), a project financed by the European Union, Germany, Belgium, Estonia, Finland and France under the [Digital for Development \(D4D\) Hub](#). Its contents are the sole responsibility of Xalam Analytics and do not necessarily reflect the views of the funders.

No part of this material may be reproduced, copied or duplicated in any form or by any means, or redistributed, without the written consent of Xalam Analytics or DIF. Any reproduction or distribution of this report, or use within artificial intelligence language models without the prior written consent of Xalam Analytics is prohibited.

The Uganda data center investment case

Uganda boasts one of Africa's fastest growing economies, improved investment conditions, moderate data center market scale

THE OPPORTUNITY

- Uganda has the **fourth largest economy in the East African Community (EAC)**.
- Stable and growing economy; GDP growth has averaged 6-7% over the past three years, one of the highest rates of economic expansion in Sub-Saharan Africa.
- **Inflation is low single digits - ~3%-5% a year.**
- The economy is expected to receive a considerable boost from the inception of oil production, potentially reaching double-digit rates.
- **The ICT regulatory regime is one of the most flexible** in the region and the Internet market is highly competitive.
- ~80% of power generation from renewable sources, predominantly hydro.
- **Considerable efforts to attract foreign investment.**

CHALLENGES & RISKS

- **Uganda's Internet adoption levels are still relatively low.**
- **Broadband penetration is around 40%**, below the African median.
- Uganda's landlocked geography has put **constraints on wholesale connectivity diversity.**
- **Scale of demand is relatively small, <10MW.**
- Some FX risk.

Uganda data center market overview

Estimates as of 2025

(1) Capacity that is active, under lease or readily available for lease by third-party customers.

(2) IT load capacity from facilities currently in construction; construction has broken ground; ongoing civil works, installation and commissioning phases are in progress.

(3) Facilities explicitly announced or listed as in development. Some execution phases have been initiated (e.g. land control, energy supply commitments, etc.), but no actual civil works have been undertaken. Capacity expected to be available by the end of 2030.

(4) Percent of available capacity that is effectively being used by third party customers.

Key drivers of demand for data centers

A small ICT base and limited connectivity have historically hampered Ugandan demand for hosting capacity – but the demand outlook is improving as the economy expands and broadband penetration accelerates

A solid base of investment inflows – Uganda FDI
US\$bn

Robust economic growth, moderate inflation
Sample Uganda economic indicators - 2025

A broadband market playing catch-up
Uganda broadband connections by type - million

Sources: IMF, UBOS, UCC and provider data, Xalam Analytics estimates

State of data center supply

Uganda’s available data center supply is still relatively sub-scale, and recent capacity growth has been flat

Uganda data center supply – 2025E

Sample market indicators (1)

Uganda vs. Sub-Saharan Africa peers

Critical IT load – in MW

Uganda data center – Live vs. potential IT load

Critical IT load - in MW

(1)Numbers are rounded up (2) Potential/Full-build load is facility capacity assuming that all phases of development have been completed. Additional CapEx would be needed to make the residual capacity operational.

Uganda facility mapping – Kampala metro

Key data center market players

The Ugandan data center market mix comprises fiber infracos, government and MNOs, most with small facilities; the dominant facility is carrier neutral

Telcos & Fiber Infracos

Focused on mobility and fiber - colocation is an adjacent opportunity.

The Data Center Specialists

Carrier-neutral data center colocation pure plays

Government

State agency offering a range of IT services, including colocation

A diverse provider landscape

- A diverse landscape comprising MNOs, infracos and government-owned facilities.
- Mostly sub-scale hybrid telco facilities or server rooms with less than 50 racks.
- Raxio is the only carrier-neutral facility, and the largest in the country.
- Nearly half of Uganda's capacity sits in a built-for-purpose carrier-neutral facility, a handful of facilities in the Kampala business district are located in high-rise buildings that share space with other businesses and facilities.
- A project by Synectics, a local firm, aims to develop an AI cluster next to a hydropower site in Uganda, but its outlook remains uncertain.

GLOSSARY & KEY DEFINITIONS

Key definitions

Data center	While there are a variety of definitions for data centers, this market review is focused on commercial facilities , that is, facilities that lease colocation white space and power capacity to third-party customers on open, commercial terms, and in exchange for a fee. Captive facilities (bank data centers, telco switch sites and similar) are excluded from this assessment. Estimates focus on facilities at Tier II standard and above, unless otherwise indicated. Where applicable, these estimates include cloud hyperscaler self-built facilities.
Live critical IT load	Capacity that is active, under lease or readily available for lease.
Full build capacity	Data center facilities are typically built in phases; the full-build capacity is capacity assuming all potential phases of build have been completed and are live.
Capacity in construction	Facilities that have broken ground; ongoing civil works, installation and commissioning phases.
Pipeline	Facilities explicitly announced or listed as in development. Some execution phases have been initiated (e.g. land acquisition, power supply commitments, etc.), but no actual civil works have been undertaken.
Carrier-neutral	Facilities not specifically affiliated to a connectivity or cloud vendor, with capacity available to all third-party customers, on equal commercial terms, without explicit or implicit constraints or favoritism. This market review uses a loose definition for carrier-neutral, referring to facilities that are purely carrier-neutral, recognized by the market or effectively managed as such.

Glossary

Below are some of the key abbreviations used in this report

AI	Artificial Intelligence
ASN	Autonomous System Number
bn	billion
CAGR	Compound Annual Growth Rate
CapEx	Capital Expenditures
CDN	Content Delivery Network
Colo	Colocation
DC	Data Center
DIF	Digital Investment Facility
EAC	East African Community
EU	European Union
F	Forecast
FBB	Fixed Broadband
FDI	Foreign Direct Investment
FX	Foreign Exchange
GDP	Gross Domestic Product
GDPR	General Data Protection Regulation
ICT	Information, Communications and Technology
ISP	Internet Service Provider
IPP	Independent Power Producer
IT	Information Technology

kW	Kilowatt
kWh	Kilowatt Hour
LLM	Large Language Models
m	million
MNC	Multinational Corporation
MNO	Mobile Network Operator
MRR	Monthly Recurring Revenue
MSP	Managed Service Provider
MW	Megawatts
NDC	National Data Center
OEM	Original Equipment Manufacturer
POP	Point of Presence
PUE	Power Usage Effectiveness
RFS	Ready For Service
SEZ	Special Economic Zone
SSA	Sub-Saharan Africa
USD	US dollar
PUE	Power Usage Effectiveness
RFS	Ready For Service
SSA	Sub-Saharan Africa
YE	Year end
